

Some suggestions for visitors with mobility impairments

\*\*\*Please note: What a person can and can't do is **NOT** up to us to decide. Abilities are as individual as fingerprints; every person's different. Any preconceived limitations are just that: preconceived. Visitors with disabilities expect and deserve to be treated with the same respect and friendliness as any other visitor.

With that said, a lot of people wonder. . . "What exactly does Red Rock Country have for an individual with a disability?" A LOT—over 300 miles of trails, multiple wilderness areas, and 2 Wild & Scenic rivers! It depends on what a visitor is interested in, and how much time they have. All is possible with the right attitude and equipment, just like with visitors without disabilities. Some suggestions to get people started might be. . .

Feel free to encourage the visitor to explore and scout out trails for themselves. Their Sedona experience is what they make it. This is **NOT** an exhaustive list, nor was it ever intended to be. Have fun!
